

Political opinion polls in Belgium in 1990

by Erwin DAS,

Assistant at the Section of Political Sociology
of the Catholic University of Leuven.

This annual review (since 1974) of political opinion polls in Belgium is classified according to the major policy sectors : foreign policy, social policy, economic policy, financial policy, domestic policy, and cultural policy. These sectors are subdivided according to the classification scheme on p. 585-587. Polls that have little or nothing to do with politics as such are placed under the heading "Other polls".

In the inventory, the title of each poll is given along with a summary description of the content, the institute that conducted the poll, the time of the polling, the size and the nature of the sample, the number of questions, the sponsor, and the bibliographical data of its publication or publications. An "X" stands for confidential or unknown.

This inventory was compiled on the basis of information provided by the opinion-polling institutes (see list below), for which we express our sincere appreciation. A valuable supplement to this information is given by the Press Review of the Library of the Belgian Parliament, Office of Press Dossiers.
